DEPARTMENT OF CHEMISTRY

Certificate Course In Personality Development (2019-2020)

The most of the students of this college are come from different villages. In this competitive world, personality plays a major role in dealing with external challenges. In addition to the regular education, it is important to have a holistic development of students which will definitely leverage their first steps towards professional world. The effectiveness of personality development lies on the confidence with which students embarks their pathways to success. Human are born with an intrinsic personality that can be nurtured further.

As compared to urban and metros areas the upbringing intrinsic confidence is far low in case for rural students. Majority of study shows that despite having almost equal educational curriculum, Indian rural areas neglect holistic personality development of students. At times despite having good scores students fail to get the desired success because of their personality traits. Most of the corporate demand smart students with good communication skills, positive attitude and self-confidence.

The department of chemistry of our college decided to present a platform that encourage the development of better communication skills, positive attitude and display of appropriate behavior. We started a certificate course in Personality Development to enhance important attributes of personality for academic year 2019-2020. About sixteen students (ten boys and six girls) were admitted and successfully completed the course. During this year Prof A P Itkapalle, Dr S M Reddy and Prof D C Pawar from Gramin (ACS) Mahavidyalaya, Vasantnagar (K) delivered lectures on important attributes of personality development. All the faculty members of the department of chemistry have given their contribution to make the course successful.
