DEPARTMENT OF CHEMISTRY

Certificate Course In Emotional Intelligence (2020-2021)

Emotional intelligence is the ability to manage both your own emotions and understand the emotions of people around you. It's a little harder to manage the emotions of other people you can't control how someone else feels or behaves. But if you can identify the emotions behind their behavior, you will have better understanding of where they are coming from and how to best interact with them.

Emotional intelligence plays a significant role in academic setting, academic adjustment and satisfaction with life. Emotional intelligence moderated the relationship between academic performance and cognitive ability. It was found that attention to emotion was positively related to depression, mental health and stress among the students. It is studied that there is a significant relation among understanding the emotional intelligence and interpersonal performance and psychological performance.

Since most of the student are from rural areas. Therefore considering all the above the department of chemistry of our college decided to explore the experiences of the undergraduate students in terms of emotional intelligence. We started a certificate course in Emotional Intelligence for academic year 2020-2021. During this year sixteen students (thirteen boys and three girls) were admitted and successfully completed the course. During this year Prof A P Itkapalle, Dr S M Reddy and Prof D C Pawar from Gramin (ACS) Mahavidyalaya, Vasantnagar (K) delivered lectures on Emotional Intelligence containing self awareness, managing emotions, self motivation social skill etc. All the faculty members of the department of chemistry have given their contribution to make the course successful.
