DEPARTMENT OF CHEMISTRY

Certificate Course In Fertilizers and Pesticides (2021-2022)

The college is located in a rural area and over 80% students come from over 50 villages within 15 km radius around the college.

The family profession of these students is agriculture. The students themselves work in the fields. For yielding varieties of the grains it involve use of chemical fertilizers, pesticides and heavy irrigation to the crop yields. The uses of chemical fertilizer as well as pesticides have been increased rapidly after 1960s. Excessive use of these chemicals have adverse effects at several levels such as depletion of soil fertility, microbial population and reduction in crop production.

Industries involved in the production of these agrochemicals are producing a huge amount of industrial effluent which contains a large amount of toxic chemicals and heavy metals. They are disturbing and disrupting the whole ecosystem, contaminating the ground water and causing several diseases. Therefore promoting awareness and including scientific approaches the department of chemistry of our college took this opportunity to aware the students regarding the importance of impact of excessive use of fertilizers and pesticides. We started a certificate course in fertilizers and pesticides for academic year 2021-2022. During this year twenty six students (Eighteen boys and Eight girls) were admitted and successfully completed the course. During this year Prof A P Itkapalle, Dr S M Reddy, Prof D C Pawar and Prof L M Advale from Gramin (ACS) Mahavidyalaya, Vasantnagar (K) delivered lectures on "Impact of excessive use of fertilizers and pesticides." All the faculty members of the department of chemistry have given their contribution to make the course successful.
